The U.S. Army Corps of Engineers is a diverse workforce of professionals. Our mission is to provide quality and responsive engineering services to the nation. History and Leadership help us meet the demands of changing times. We are a vital part of the Army. We take pride in our work!

Construction is what the U.S. Army Corps of Engineers is all about. Construction is the reason for our existence, whether the project is for Military, Civil Works or Work for Others.

The RMS Center is maintained to assist field engineers, inspectors, construction representatives, contractor staff and office personnel perform their duties by providing computer programs and automation expertise to plan, accomplish, and control the daily technical and administrative functions of construction projects managed by the U.S. Army Corps of Engineers.

The Resident Management System (RMS) and the Quality Control System (QCS) are quality management and contract administration programs designed by Resident Engineers. The systems provide an efficient method to plan, schedule, and control all aspects of construction.

The Government Staff will use the RMS program and the Contractor Staff will use the associated QCS program.

QCS Installation

Setup as a 'Server' on the QCS machine.

Note: The QCS system can be networked to run on multiple computers. Refer to User guide for networking information (website at end of this section).

QCS Setup 2.37.1.7

QCS Install Type

- Stand Alone (one computer by itself)
- Server (network)
- Client Only (network)

Click the **Next** button

< Back

Next >

If you are installing the QCS as a “Server and Client” system (not on a network, but on a single computer station) you must select “Stand Alone (one computer by itself) to install both the QCS program and the database (Firebird©) on that computer

Single Stand-Alone System

Install a single stand-alone system (Client-Server on one machine). This machine will provide total control of QCS, including data entry and exchange of data with the Government. This could be the Home Office, Jobsite Trailer, and so forth. The installed program would have a unique Site ID and Title

QCS Setup 2.37.1.7

QCS Install Type

- Stand Alone (one computer by itself)
- Server (network)
- Client Only (network)

Click the **Next** button

< Back

Next >

You are ready to begin installing the QCS program

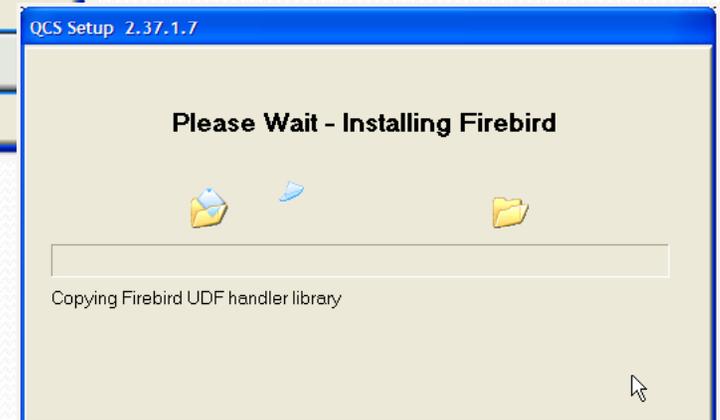

If you are installing an update, or reinstalling the program, QCS will detect it and install components as needed.

Selection of path for Firebird Database Engine

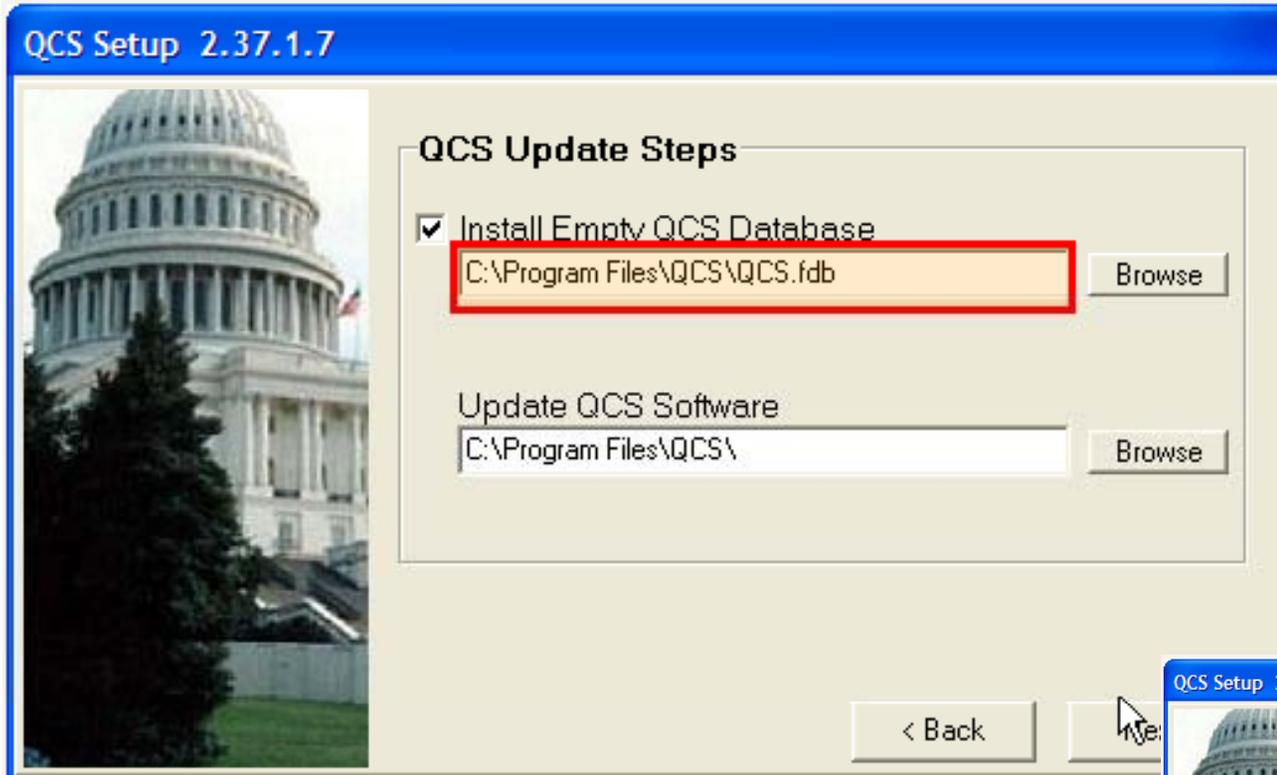

For the first time setup of QCS you see this window, you can change the path specified but we recommend you leave it as it is shown and click next button.

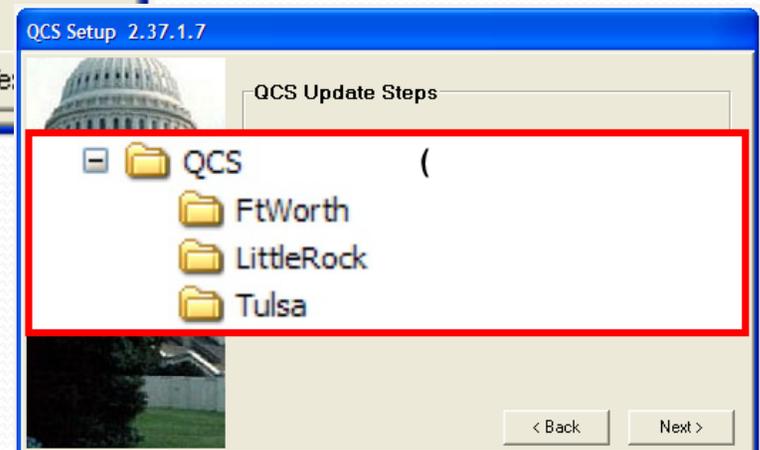

Installation of Empty QCS Database

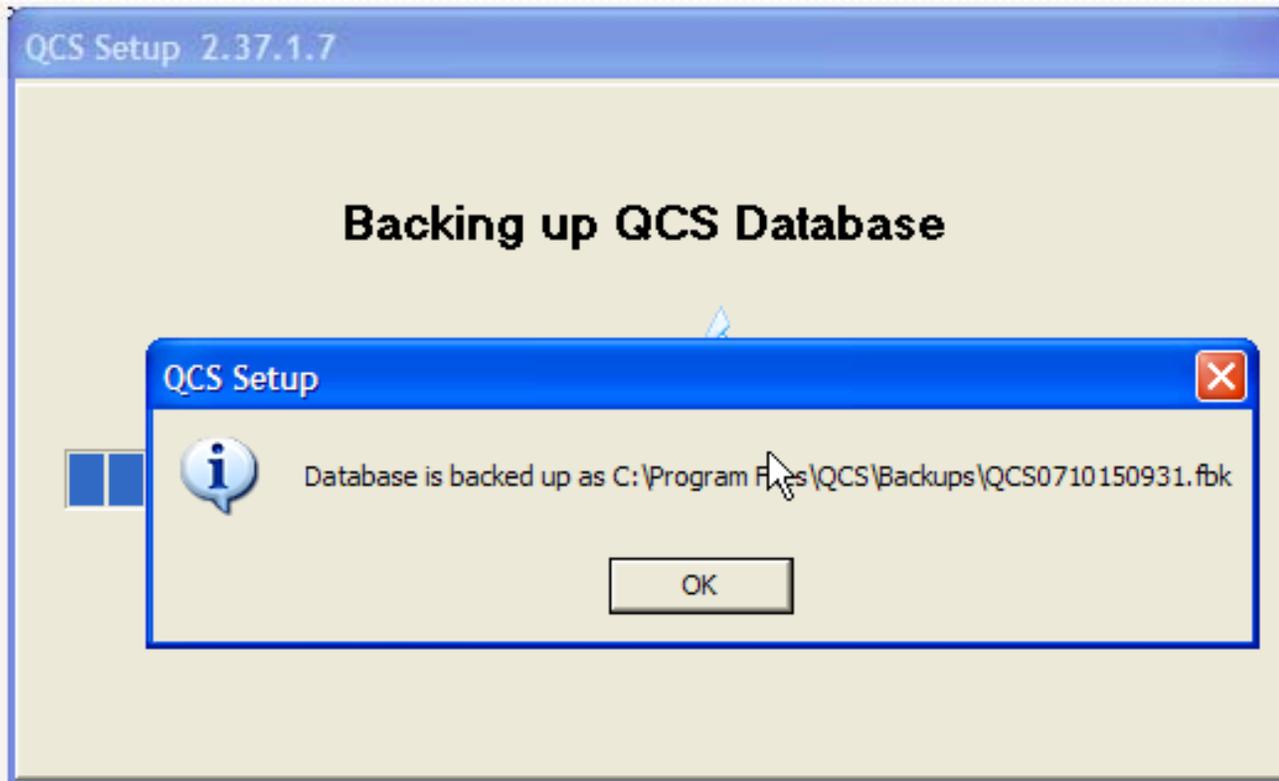

By this window you can change the name of QCS database and location of which and the same for its software in lower blank by clicking on the Browse button.

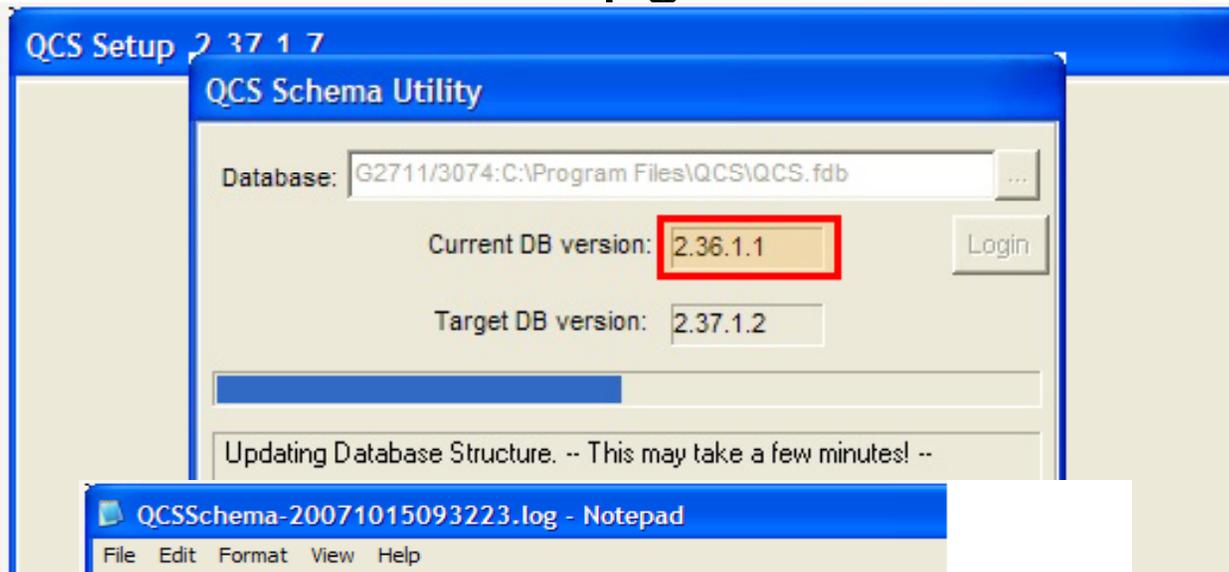

Backing up QCS Database

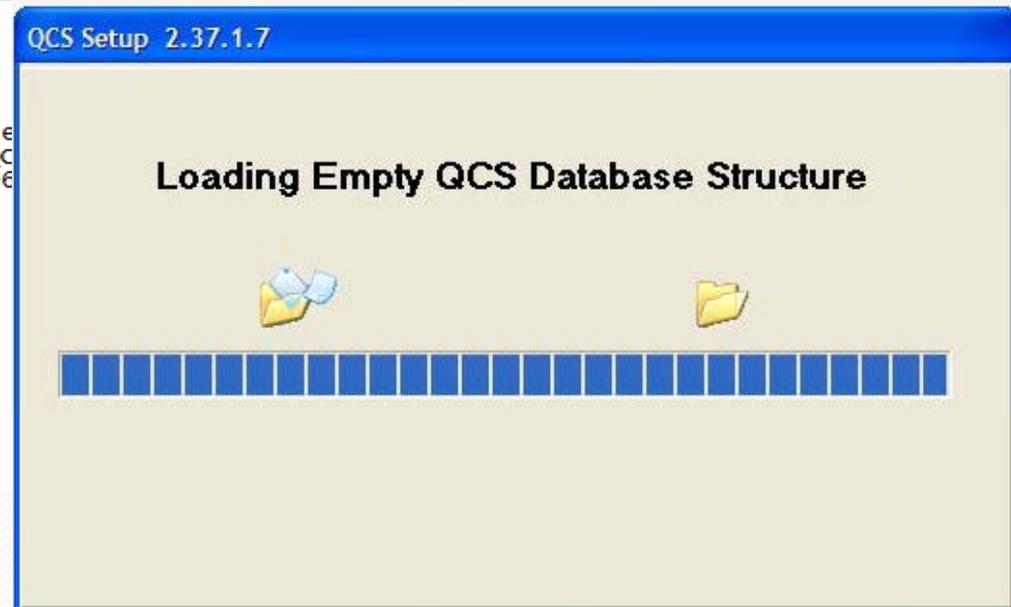

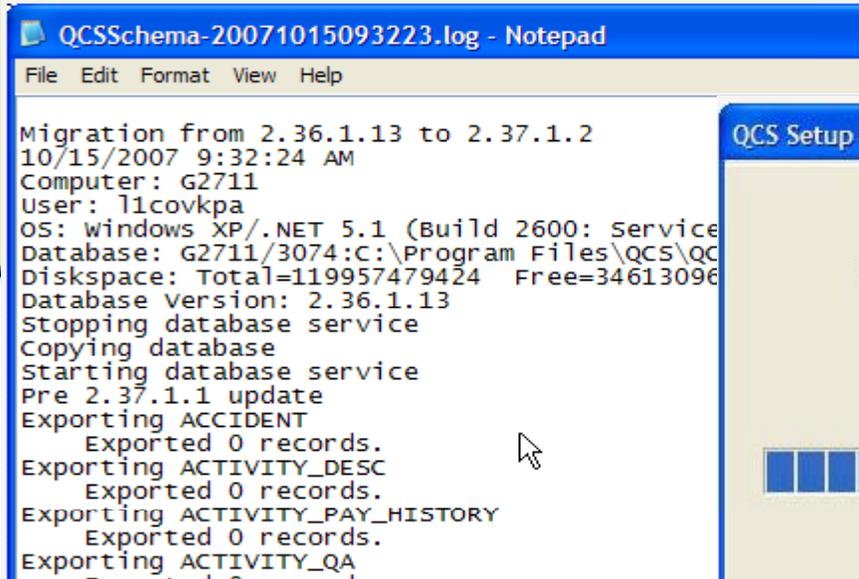

This window shows that QCS database is backed up where, on the path shown.

QCS Version Upgrade

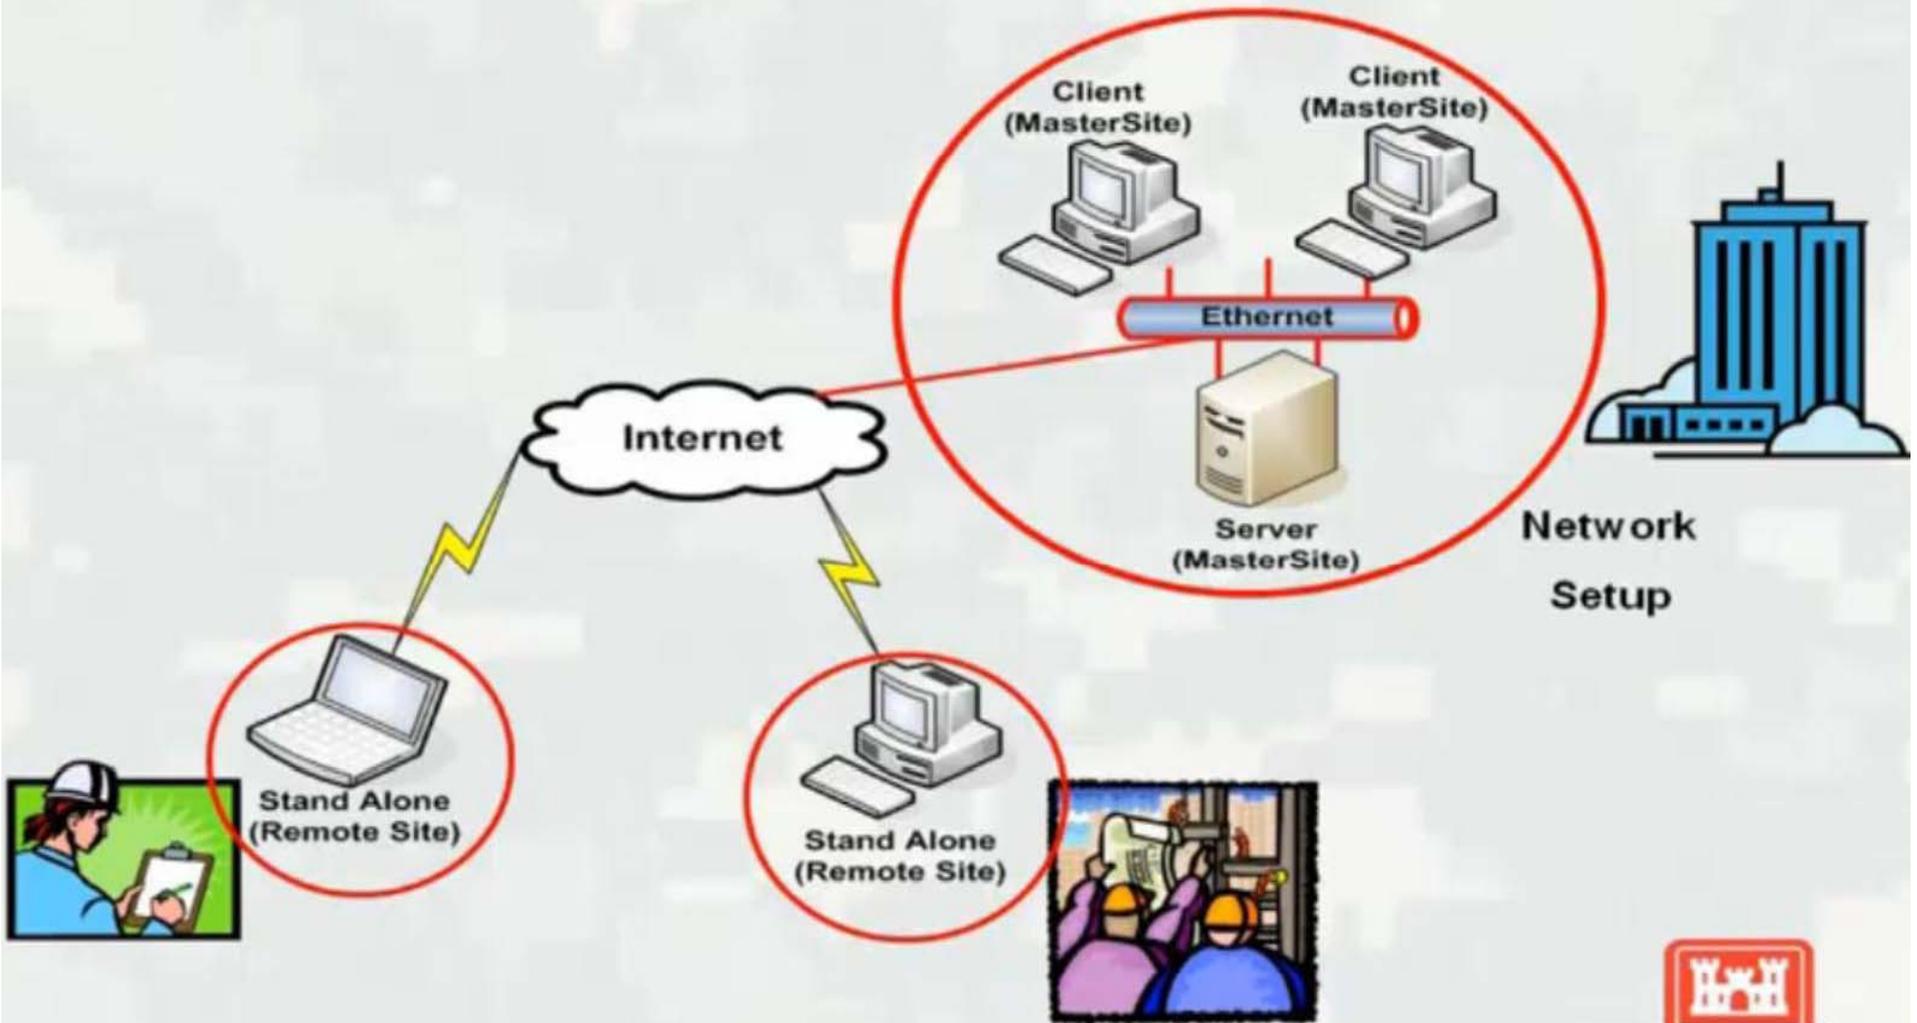

This window shows upgrading from current version to a new version on the path already specified.

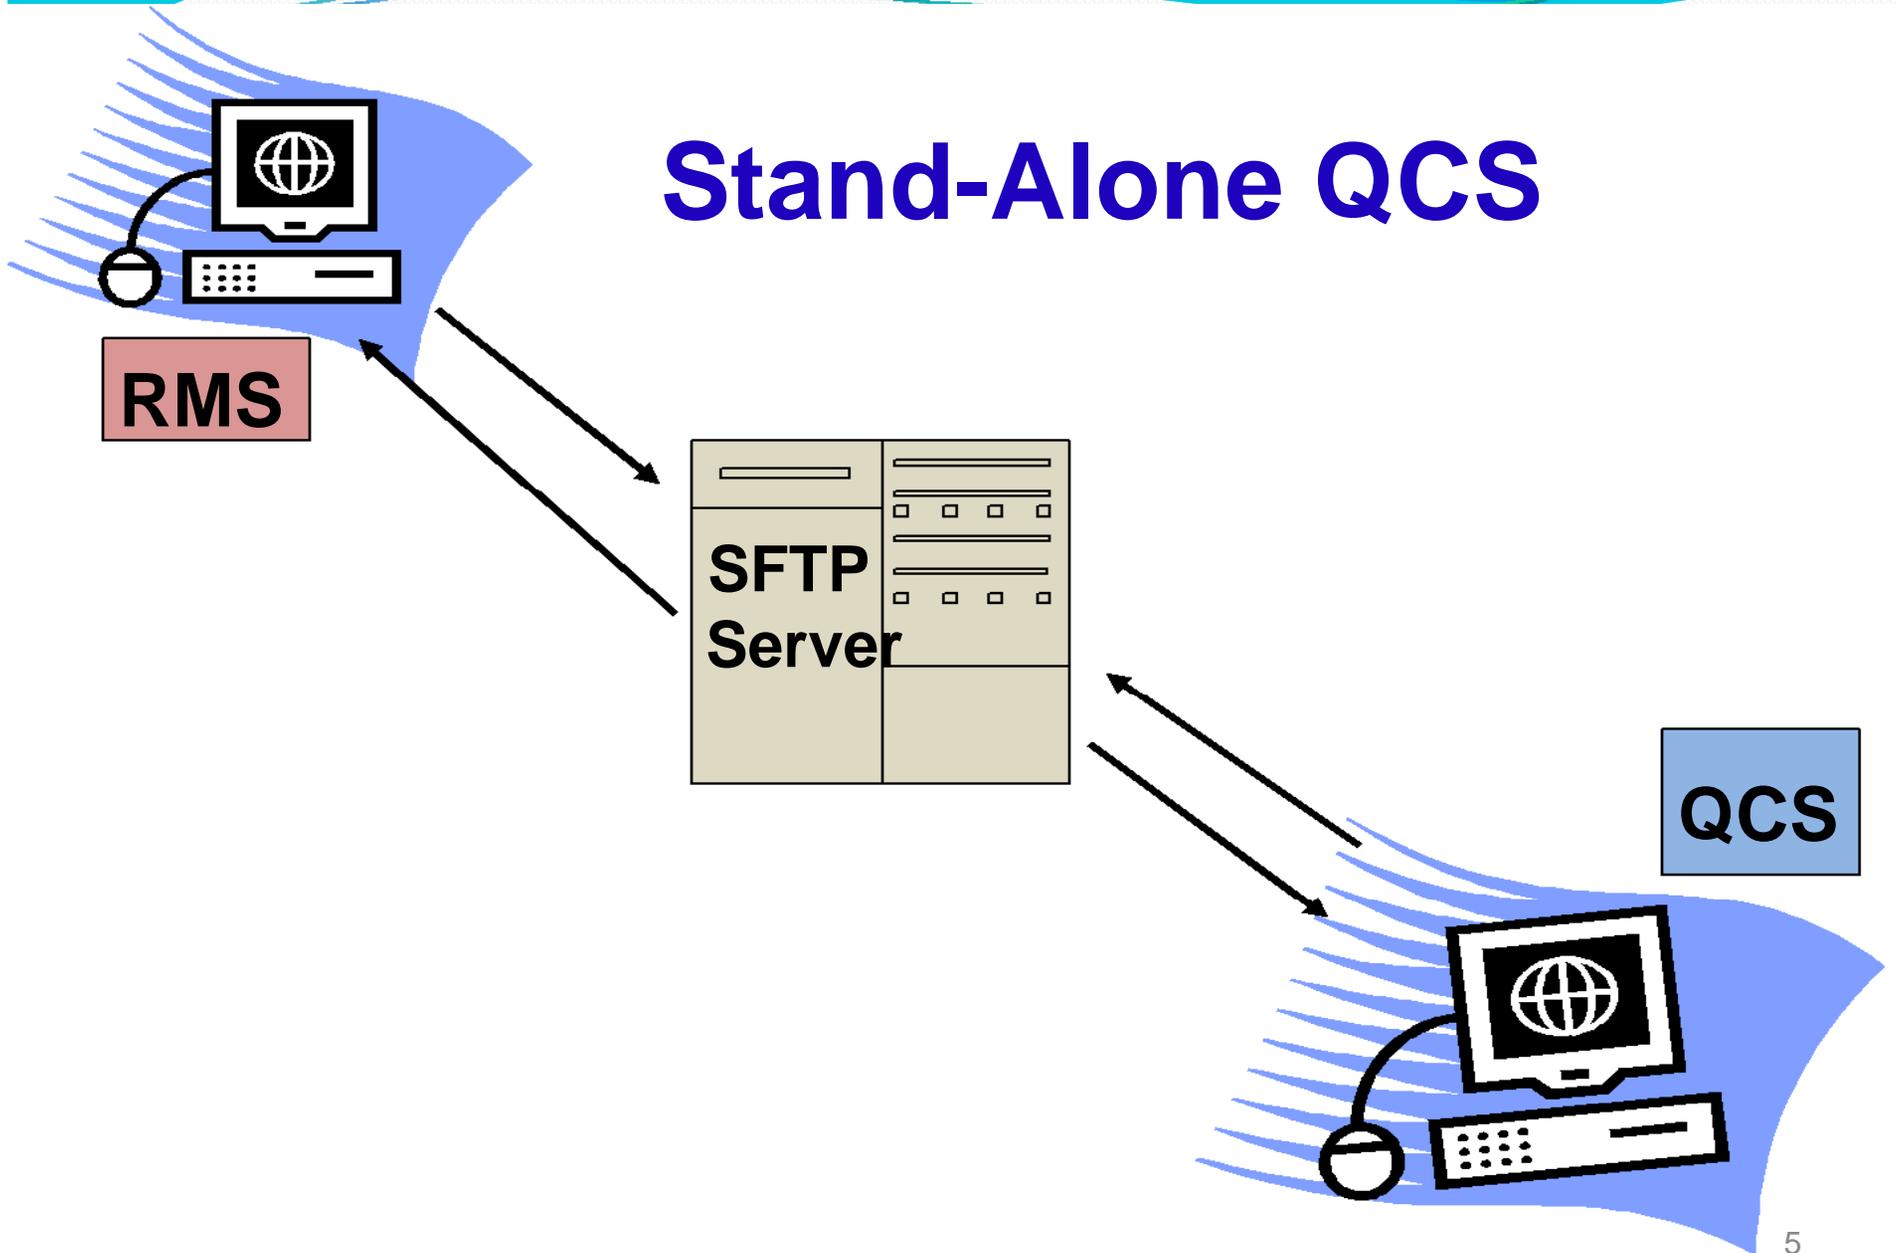

Types of Setups

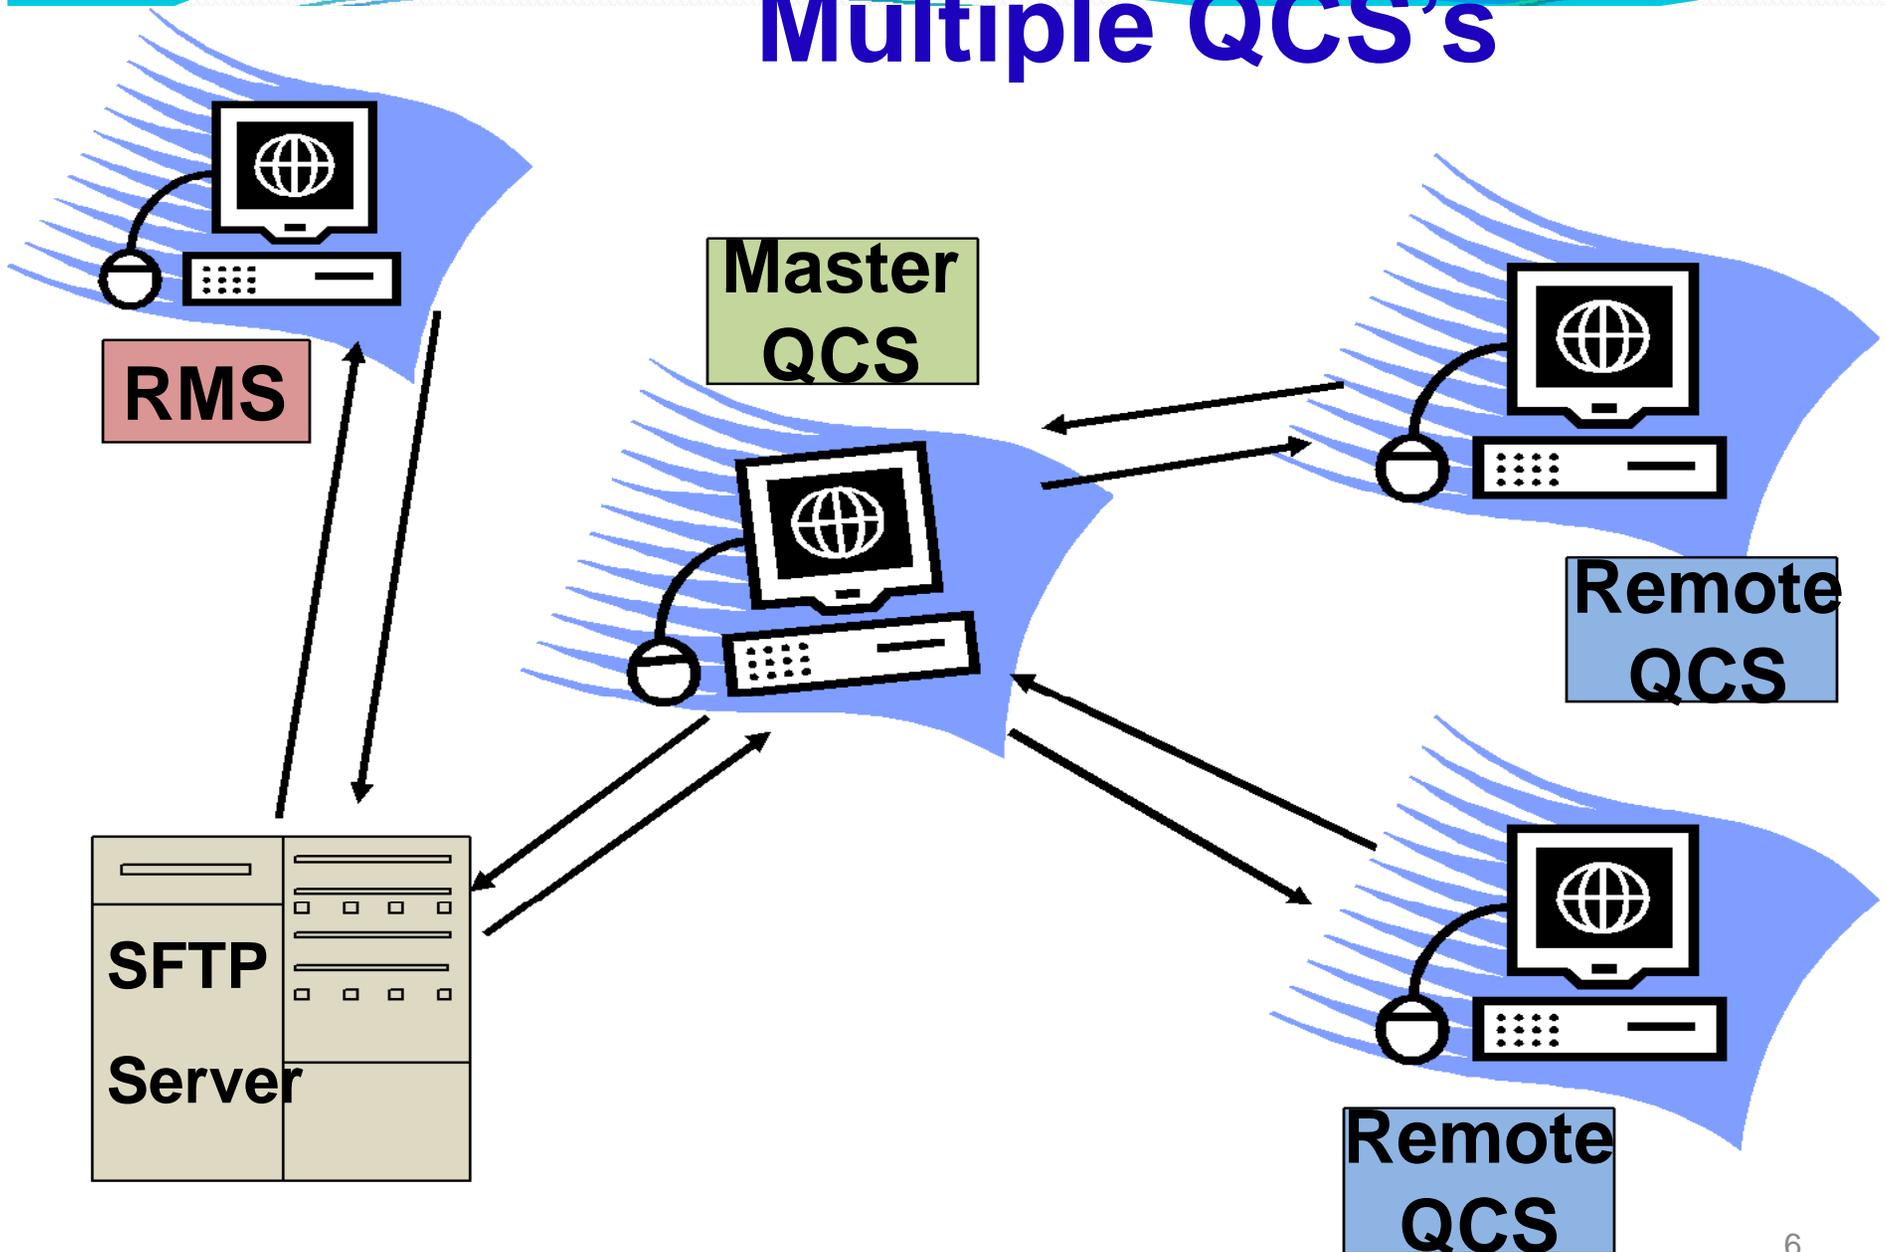

Stand-Alone QCS

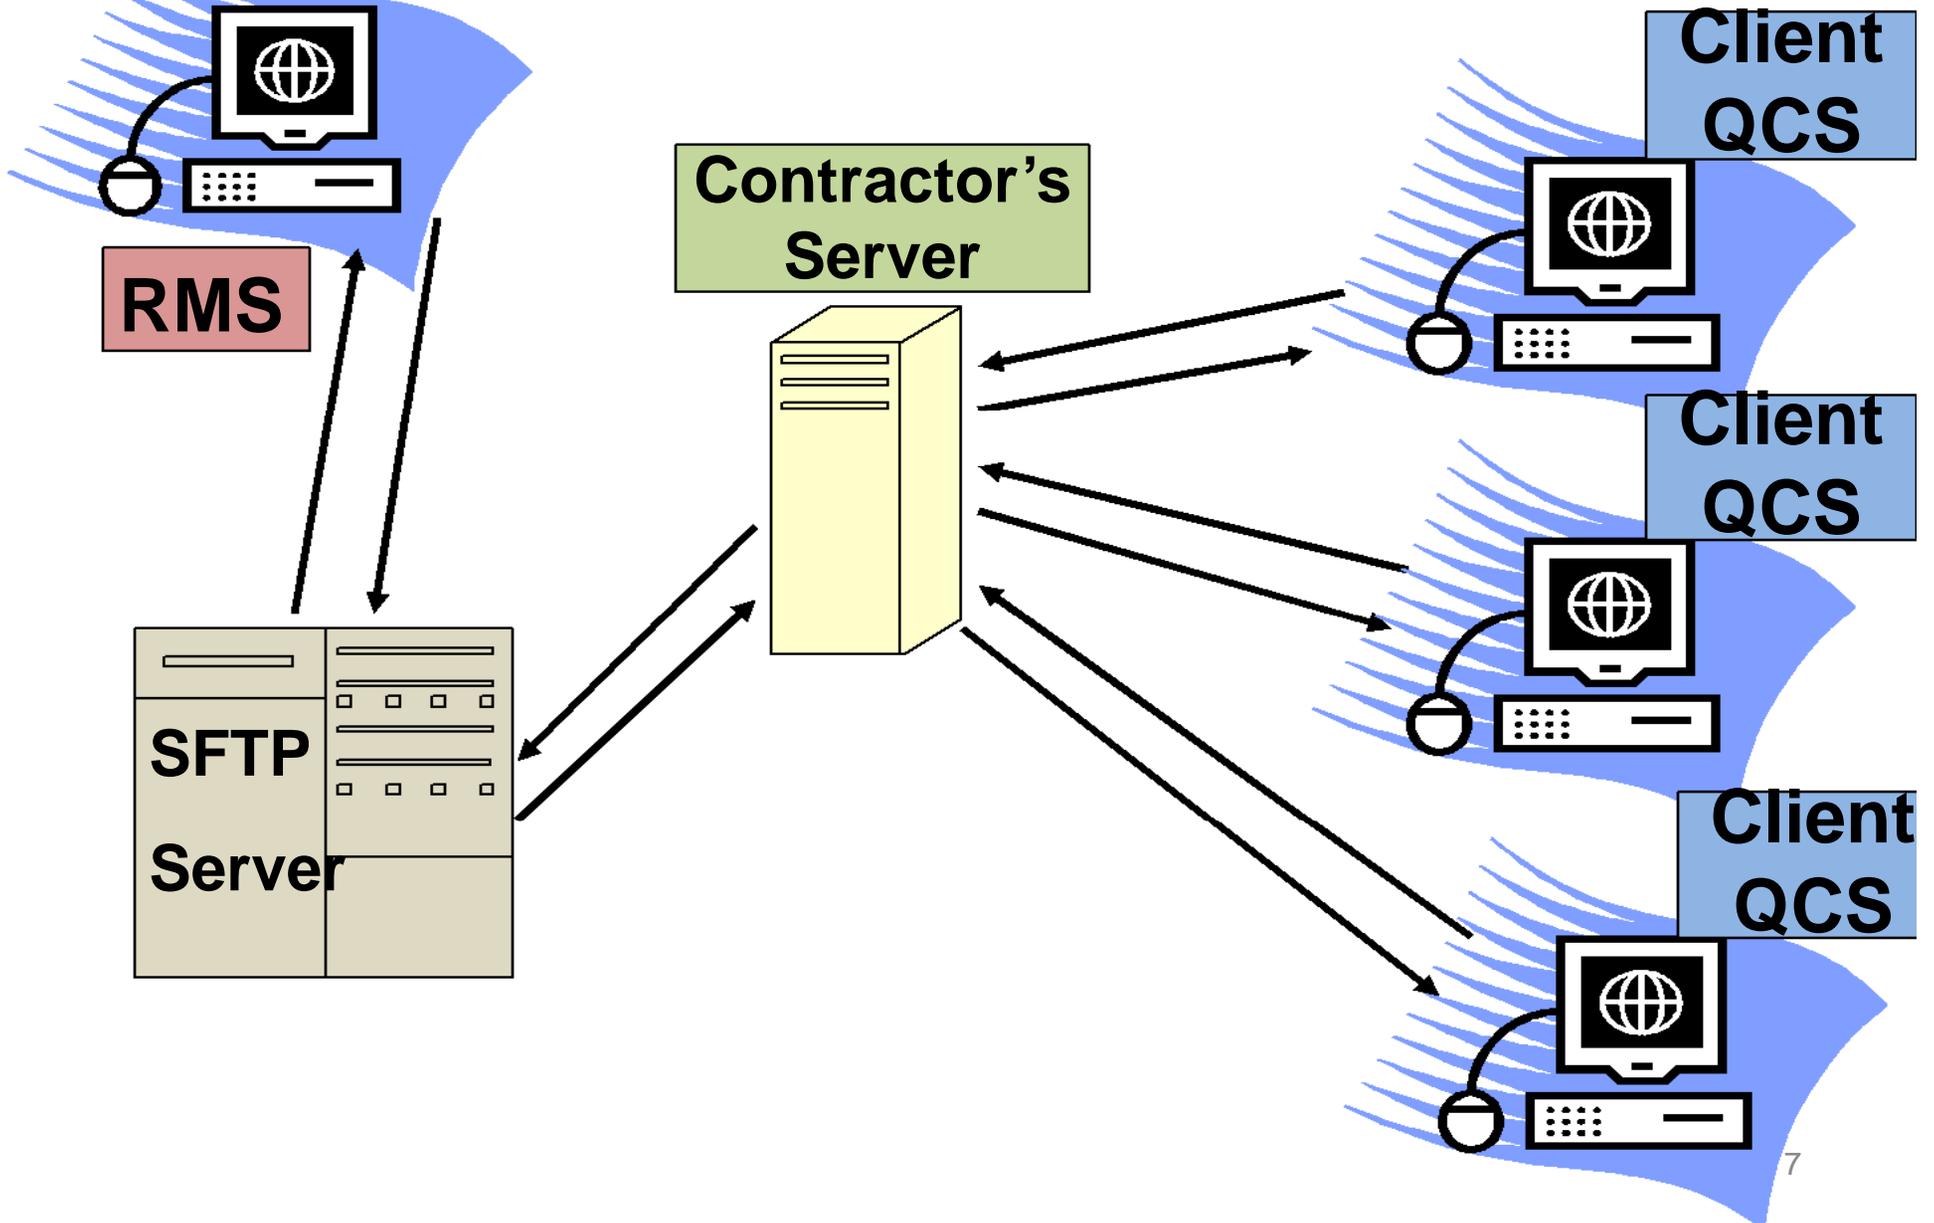

Multiple QCS's

QCS on a Server

Running QCS Immediately or later

QCS Setup 2.37.1.7

QCS Install Completed

Run the QCS program immediately

Finish

QCS logon screen

- Go to **Start / All Programs / QCS /** and select the QCS red-castle icon to start using QCS. Double-click it for the logon screen.

QCS 2.38.1.27

Enter your User ID and Password

User ID: SYSDBA

Password: []

Site ID: 6H1EED

Database

Login Cancel

Database: \\mf-eb-01575254/3074:c:\program files\qcs\qcs.fdb

Default user ID is shown above and the password is “**masterkey**”. Also the site ID is shown and will be required by the COE to get you a setup import. ***The SITE ID is unique for every installation.***

Once you are logged into the system then you have to get a project setup disk, or the M2 # and download from the FTP by selecting ‘Add’, from the Corps of Engineers (COE) to set up a new project on your machine.

Technical Support

- Most issues are resolved locally by the AED RMS/QCS Systems Admin . If QCS issue beyond our control we contact the Technical Support Center. They are Pacific time.
- **Help / About Screen**

The Help/About Screen can be used to verify the version of your database and software, and shows where your database is located. This information will be needed if you run into technical difficulties and require assistance from the RMS Center.
