Mark D

NOTES

1. All mark numbers shall have prefix KAJ 15-F-14.
2. Approximate weight of one wheel assembly 1100 lbs.
3. For paint requirements see specifications.
4. For lubrication install 3 grease fittings (N) in cover (B) and pump grease until grease issues from open holes in cover (C). Then insert pipe plugs (M) in holes in cover (C) and force grease out ground seal. After all voids are filled replace fittings (N) with plugs (M) in cover (B). Use lime base grease. Ship wheel assemblies fully lubricated.
5. Provide five pound capacity, manually operated, grease gun with 6-ft hose and coupler to suit (N).
