6. PROPOSAL SUBMISSION REQUIREMENTS AND INSTRUCTIONS

- a. REQUIREMENT FOR SEPARATE TECHNICAL AND PRICE PROPOSALS.
DO NOT MIX CONTENTS OF VOLUME 1 (Technical) AND VOLUME 2 (Price) IN THE SAME BINDER.

(2) Each Offeror must submit a Technical Proposal and a Price Proposal. The Technical Proposal and the Price Proposal must be submitted as separate volumes. Both the Technical and price proposal shall be paginated (contain consecutive page numbers on each page).

The outside cover of each separate volume (Vol 1 – Technical; Vol 2 – Price) must be clearly marked to indicate its contents and the identity of the Offeror. Additionally, identify the “original” Technical proposal and the “original” cost/price proposal on the outside cover.

(3) Both the Technical Proposal and the Price Proposal must be received by the closing date and time set for receipt of proposals.

(7) Do not attempt to modify the terms and conditions of the solicitation in either the technical or price proposal or add conditions or qualifications to your offer. Should the Offeror include terms and conditions that conflict with the terms and conditions of the Solicitation, the offer may be determined "unacceptable" and thus ineligible for award. Any questions related to specific terms and conditions contained within the Solicitation should be resolved prior to submission of the offer. Notwithstanding the above, the Offeror must clearly describe on the Proposal Cover Sheet submitted with the Price Proposal any modifications to the contractual and/or technical terms and conditions of the solicitation contained in the Offer.

(8) Failure to submit required documents or failure to properly complete documents may result in rejection of the offer without further evaluation. Therefore, Offerors are urged to follow instructions carefully and to speak with the Contracting Officer if the Offeror does not understand any part of the Solicitation.

b. DISCUSSIONS. The Government intends to evaluate proposals and award a contract without discussions with Offerors. Therefore, the Offeror's initial proposal should contain the Offeror's best terms from a cost or price and technical standpoint. The Government reserves the right to conduct discussions if the Contracting Officer later determines them to be necessary. If the Contracting Officer determines that the number of proposals that would otherwise form the competitive range exceeds the number at which an efficient competition can be conducted, the Contracting Officer may limit the number of proposals in the competitive range to the greatest number that will permit an efficient competition among the most highly rated proposals.

c. GENERAL INSTRUCTIONS.

SECTION 00120 6NOV2010

**SECTION 00120
PROPOSAL EVALUATION AND CONTRACT AWARD**

LOWEST-PRICED, TECHNICALLY ACCEPTABLE (LPTA)

1. ELIGIBILITY FOR CONTRACT AWARD.

In accordance with the Federal Acquisition Regulation (FAR), no contract shall be entered into unless the Contracting Officer ensures that all requirements of law, executive orders, regulations, and all other applicable procedures, including clearances and approvals, have been met. This includes the FAR requirement that no award shall be made unless the contracting officer makes an affirmative determination of responsibility. To be determined responsible, a prospective contractor must meet the general standards in FAR Part 9 and any special standards set forth in the solicitation.

2. LOWEST PRICE TECHNICALLY ACCEPTABLE (LPTA) SOURCE SELECTION PROCESS.

An evaluation for acceptability will be performed on each proposal in accordance with FAR 15.101-2(b)(1). The proposal that provides either the lowest price within 25% above or below the Independent Government Estimate or within 25% above or below the average of all of the offers received and is otherwise technically acceptable in all factors will be selected for award. To be considered technically acceptable, no technical factor in the proposal may be determined to be unacceptable. The failure of a proposal to meet all of the requirements under any Factor will result in a technically unacceptable rating and preclude award.

The Government will evaluate proposals as follows. Each proposal will be evaluated by a single evaluator of the Source Selection Evaluation Board (SSEB). If any Factor is determined "NO GO" by the evaluator, the evaluator will fully disclose the issue(s) to the other SSEB evaluators of the Source Selection Evaluation Board. The other members of the SSEB will then review the individual adverse assessment. No factor will be rated as a No Go unless there is a consensus among the SSEB members that the assessment is consistent with the evaluation criteria stated in Section 00120.

The Government price evaluators will conduct a price analysis of overall prices. Total prices submitted by the Offeror that are determined to be more than 25% above or below the Independent Government Estimate or more than 25% above or below the average of all the price proposals received in response to the solicitation will be considered to be unreasonably high or unrealistically low and will not be considered for award. In the event the Government receives more than ten proposals in response to this solicitation, the Government will evaluate proposals as follows. First, the Government will determine which ten complete proposals have the lowest overall proposed prices. The technical (non-pricing) volume(s) of each of these proposals will be given to the Technical Evaluators for review, without identification of the prices or any rank order of prices. If no proposals are found to be technically acceptable within this first group of proposals, then the process described will be conducted again, as many times as necessary, until such time as the Government identifies a technically acceptable proposal(s). Should no proposal be determined technically acceptable, the Contracting Officer will establish a competitive range consisting of the most highly rated proposals. After receipt of the Offeror's responses raised during Discussions with all Offerors included in the competitive range, responses will be rated again in the same manner as in the initial evaluation.

3. BASIS OF AWARD.

Subject to the provisions contained herein, award will be made to one (1) Offeror who is deemed responsible in accordance with the Federal Acquisition Regulation who conforms to the solicitation requirements; and whose proposal, judged by an overall assessment of the evaluation criteria and other considerations specified in this

solicitation meets the technically acceptable standard for the non-cost factors and provides the lowest evaluated price.

4. EVALUATION OF THE PRICE PROPOSALS

Price will be evaluated and considered but will not be scored or combined with other aspects of the proposal evaluation. The proposed prices will be analyzed for reasonableness. Additionally, all offers will be analyzed for unbalanced pricing.

The otherwise technically-acceptable lowest-priced Offeror may be required to confirm/validate its price on a Contract Line Item (CLIN), element, or total price basis, and/or provide additional information in support of their price, prior to contract award at the Government's request and discretion.

5. EVALUATION OF THE TECHNICAL PROPOSAL.

The Technical Proposal will be evaluated based on the following evaluation criteria:
