SECTION SF 30 BLOCK 14 CONTINUATION PAGE

SUMMARY OF CHANGES

SECTION SF 30 - BLOCK 14 CONTINUATION PAGE

The following have been added by full text:

QUESTION AND ANSWERS**QUESTION AND ANSWERS**

Q1: Section 01010, para 3.e (Additionally, the existing road network is required to be provided for each site), please clarify. What would be the required coverage area for the road network to be considered?

A1: This is meant to be a description of whether there are roads connecting the site with larger population centers, and sources of labor, and materials.

Q2: Please confirm that price quotation will be based on 10 sites.

A2: The price quotation is based on a per-site assessment. The statement of work was written to indicate that for at least 10 sites per year we will require a quicker delivery period than for the typical site.

Q3: These sites are in Kabul or all over the country. If so please name the location.

A3: They are all over the country. There is no specific location. They could occur in any province, or any district in Afghanistan.

Q4: Any escort for safety measures is required in order to carry on the sites assessments?

A4: The Contractor is responsible for their own security, but they will be coordinating with local police to pinpoint the site, etc.

Q5: What would the acceptance criteria for requested GPS points?

A5: $\pm 3m$

Q6: Are the sites accessible by cars? Please clarify.

A6: That's something you need to tell us in your Site Assessment. Some of these sites will be remote, or in the mountains.

Q7: Are northing and easting for these sites would be given in order to locate these sites?

A7: Yes. We will provide either a center coordinate, or four corner coordinates.

Q8: Would the evaluation of existing building, water and utilities referred only and if they are located within these sites. If not what would be the required coverage areas for building, water and utilities to be evaluated.

A8: Within these sites or adjacent. For instance:

Are there existing buildings adjacent to the provided site? Are there existing buildings on the site? If there are adjacent properties, are they hooked up to utilities? Are there complexes or population centers near enough where utilities exist? Have adjacent sites successfully drilled a well? If so how deep is the water table? Think about characteristics of the surrounding area that would be useful for new construction projects. Those are the types of details we are looking for. We don't need a report on the whole village/city/town/district, so much as we're looking for what would be useful near the site for construction.
