Roger Kohls is Afghanistan Engineer District-South's Bulldog of the Week

KANDAHAR AIRFIELD, Afghanistan — Bulldogs are observant. When it comes to ensuring excellent workmanship, Roger Kohls' observations as the quality assurance representative and civil engineering technician for the Dwyer Resident Office ensured that safety and quality standards were met on several key projects.

"Mr. Kohls is very attentive to quality and safety aspects and has been recognized by the Safety Office for his outstanding efforts in the area of Safety," said Charles Bauer, Helmand Area Office resident engineer. "He has done an outstanding job of thoroughly reviewing the contract requirements and has found several features of work that were included in the request for proposal, but were omitted in the final design."

Kohls' work will allow the government to resolve these issues with the contractor, Bauer said.

"Roger is doing great things out there at Dwyer," said South District Commander Air Force Col. Benjamin Wham, adding, "especially for his work on one of my favorite projects: the modular barracks, better known as "RLBs." He has also been recognized for his diligence in ensuring a safe work environment-- my top priority. I am proud to have Roger Kohls as part of the South District Team."

Kohls deployed to Afghanistan from the Seattle District.

USACE's Afghanistan Engineer District-South provides design and construction services throughout southern Afghanistan to support the International Security Assistance Force and U.S. Forces-Afghanistan. The work is carried out in Regional Commands South, Southwest and West with the goal of achieving counterinsurgency effects and bolstering the Afghan Government's services to its people.
