## Robert M. Greco is Afghanistan Engineer District-South's Bulldog of the Week

KANDAHAR AIRFIELD, Afghanistan — Bulldogs are powerful. Robert M. Greco used his power of organization and leadership as an Afghanistan Engineer District-South project manager to improve working relationships with key project stakeholders and to contribute to the betterment of Afghanistan. For his efforts, he was named this week's Bulldog of the Week.

According to his supervisor, Linda Murphy, the district's Water and Infrastructure Project Management branch chief, Greco led the section's efforts with the Kandahar University Law Library and Kandahar Airfield Juliet Ramp projects.

"He also has been instrumental in communicating the history of the Shindand Hospital and worked closely with the regional command to request additional funding for its expansion," she said. "His extensive knowledge and strong management skills have been the key to the success on numerous road projects, particularly Nawa to Lashkar Gah and Route 611."

"Robert is one of my "go-to" guys in the district," said South District Commander Air Force Col. Benjamin Wham. "Everything he produces is top notch. He has both great depth and clarity which helps him make those key decisions. It's great to have him as one of our teammates."

Greco deployed to the South District from the U.S. Army Corps of Engineers New York Engineer District.

USACE's Afghanistan Engineer District-South provides design and construction services throughout southern Afghanistan to support the International Security Assistance Force and U.S. Forces-Afghanistan. The work is carried out in Regional Commands South, Southwest and West with the goal of achieving counterinsurgency effects and bolstering the Afghan Government's services to its people.
