

Postcard from Afghanistan

Albert Rice - Fort Worth District

I came here from Fort Worth District because I wanted to take this once in a lifetime opportunity. I am currently assigned to the Kunduz Resident as a Construction Control Representative working with the ANA 2/209th @ Camp Pamir. I have enjoyed immensely the camaraderie and overall teamwork of working with a very diverse and skilled group of USACE and US Army, and Air Force personnel. I also have enjoyed learning the customs, and getting to know the local people of Kunduz, Afghanistan. This is a very beautiful and diverse country, with varying landscapes, that I enjoy viewing when I get the chance. I definitely see the difference in how the United Army Corps Of Engineers

is making in the efforts we are pursuing over here. This is a once in a lifetime experience that I will definitely cherish and make sure I will never forget what we have accomplished. I am very confident that the people of Afghanistan are very appreciative of our efforts. It is equally rewarding to train the Local National Afghan Engineers to build the complex projects that will help sustain the people of Afghanistan for the next 10 to 25 years. I really hope that what we are doing over here will help jumpstart the people of Afghanistan to bring their country into the next realm of technology and innovation.
